

# Capture™ and Capture IR™ ...

**“By far the easiest digital scouting cameras I’ve ever used!” – Walt Larsen, Outdoor Writer**

The new Cuddeback Capture and Capture IR are remarkably easy to use. You'll learn to operate them in just a minute or so. Capture's innovative Rotary Switch programming makes setup as simple as setting an alarm clock (see below). But, while Capture is easy to use, it does not sacrifice performance. Revolutionary Hair Trigger™ Technology gives you trigger speed that is over twice as fast as previous Cuddeback models. You also get exceptional battery life – up to 2,000 images (or more) per set of batteries. Capture has a faster recovery time, too. This allows for a delay of just 30 seconds. And, you'll be impressed with the quality of the images, especially when you zoom in or enlarge. All of this at a great price!

## Capture™ & Capture IR™

- 3 MP camera with Pixel Plus™ for enhanced image quality
- Hair Trigger™ Technology; more than twice as fast as previous Cuddeback models (as fast as 1/3 of a second)
- 40 foot flash range (25 ft infrared illumination for IR)
- Easy-to-use rotary switch for programming
- Test mode to determine detection zone
- Five delay settings, from 30 seconds to 30 minutes
- 24 MB internal memory holds 100s of images
- SD card – removable image storage (card not included)
- Weatherproof housing features 3-D Reality™ camo

### Color images 24/7

The Capture takes color images day and night.

### Color by day, infrared by night

The Capture IR takes color images during the day and black/white infrared images at night.

40 foot flash range

Operates on 4 D cell batteries (which are easy to load/unload)

Hair Trigger™ Technology (over twice as fast as previous Cuddebacks)

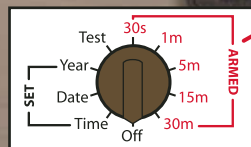

3 MegaPixel with Pixel Plus™ Image Quality (for enhanced detail when zooming/enlarging)

Uses SD card (card not included)

### Capture is this easy to operate:

- Install batteries, insert SD card
- Rotate switch to "Time," press A/B to set
- Rotate switch to "Date," press A/B to set
- Rotate switch to "Year," press A/B to set
- Rotate switch to one of five delay settings and you're done. It's that simple!

Features and specifications subject to change.

Fast trigger speed, long battery life
